2026 CATALOG

Workrite®
FIRE SERVICE

Firefighters deserve a uniform that puts forward the same level of dedication as they do. At Workrite® Fire Service we deliver protection without compromise and pour every ounce of passion into advancing your safety while on the job. Our station wear garments offer an added layer of NFPA® 1970 (1975) compliant, flame-resistant (FR) protection that works with you during any part of your workday.

Workrite® Fire Service is a PPE station wear manufacturer focused solely on the fire service industry. We do everything in our power to outfit you with the best of FR station wear—while also bringing you education, innovation, training, advocacy, and design that understands your job and adapts to it, and service that is unparalleled in this industry—or any industry.

MADE FOR THIS.

THE FUTURE OF PROTECTION IS **FR.**

OUR WHY?

Because “what you wear under your PPE matters.” Fire departments adhere to numerous standards for all of their (PPE) equipment - from their apparatus to their boots. We want to understand, why do departments stop at the inner most layer? Our research shows 75% of firefighters don’t wear FR station wear and many of those look to polyester as a low-cost option.

WHY WE KNOW “IT MATTERS”

- Standards state “It Matters” - NFPA® 1975 / NFPA® 1500 ~ (NFPA 1500, 2018, Annex A.7.1.5)
- Independent data shows “It Matters” ~ (Don Abbott, 2015-2017, Project Mayday), 4300 submissions approximately 600 of those incidents showed firefighters receiving burns under their turnout gear and surviving
- The law requires “It Matters” - OSHA GDC requires you protect employees against known hazards

SYSTEMS LEVEL APPROACH

Your NFPA® 1971 compliant structural ensemble requires FR in every layer. So why would fire service allow a meltable to be against the skin as station wear? Our approach is to provide FR protection at the inner most layer - your station wear.

PURPOSE BUILT DESIGN

OUR DESIGN EXPERTS ARE BACKED WITH YEARS OF EDUCATION AND INDUSTRY KNOWLEDGE with a combined 70+ years of experience in the garment manufacturing industry along with a combined 16 years of design education. We know every stitch, every seam, every fabric construction, and blend. Rest assured when it comes to building the right fire service uniform, you're in the best hands.

OUR MERCHANDISING DESIGN TEAM STANDS BEHIND A PURPOSE-BUILT DESIGN PROCESS. We're designing uniforms solely for the fire service industry. Functionality, durability, and safety are top of mind. Need mobility when you're bending, kneeling, and moving? Cue ergonomic, articulated knees built-in to your pants for freedom of movement. Critical response times require ease of donning/doffing your uniform? Our false button front with snap closure won't slow you down. When it comes to safety, we are a no melt, no drip manufacturer. On the job functionality is built into every feature to create protective garments that work with firefighters, while still providing the crisp, professional appearance firefighters are known for.

WE STRIVE TO MAINTAIN THE HIGHEST QUALITY PRODUCTS. We partner with leading fabric and trim suppliers to come up with exclusive and innovative offerings to best serve the fire service industry. Our quality department audits every seam and stitch, ensuring the highest quality garments. Our color specialist reads every fabric submit as we know there's a big difference between navy and midnight navy. Members of our in-house technical team participate on standards-writing committees to stay up to date on all fire service-related performance standards. We hold our fabric and trim suppliers to reoccurring testing protocols. In addition to required annual recertifications, we conduct routine quality checks and periodic testing to assure ongoing compliance.

ETHNOGRAPHY IS A KEY PART OF OUR JOB DESCRIPTION which means we are out in the field talking with the men and women within fire service, observing them on the job to determine their day-to-day movements and uniform needs. We host focus groups to understand the individual needs of all the firefighters we serve. If needed, we come to your fire station, armed with tape measures to ensure the proper fit. Sending one of our designers rappelling down multiple stories alongside firefighters in training? We call that research.

PROUDLY MADE USING USA FABRICS and ethically manufactured in this hemisphere through Workwear Outfitters owned manufacturing facilities and top-rated manufacturing partners.

HERITAGE COLLECTION

From generation to generation, you want a uniform you know you can count on. The Heritage Collection is an impeccably detailed, classically profiled homage to the fire service legacy: shirts and pants with features that go beyond the call. A flame-resistant fabric that protects, function that responds to the daily needs of your job, and a professional appearance that reflects the honor and integrity you feel for your service.

HOW TO MEASURE

MEN'S MEASUREMENTS

WOMEN'S MEASUREMENTS

A - NECK

Measure around the base of your neck where a collared shirt would fit; or measure a collarband of a shirt that fits you well. Lay the collarband flat. Measure from the beginning of the buttonhole to the center of the button.

B - TRUNK

Measure from the base of the neck (front) down around the crotch and back up to the bottom of the collar. For coveralls only - see Diagram.

C - CHEST / BUST

Measure at the fullest part of your chest / bust. Hold the tape firmly, but not tightly. Be sure the tape is level and straight across your back. Stand naturally with your arms down by your side.

D - WAIST / MID SECTION

First, remove your belt. Then measure over shirt (not over pants) at the position you normally wear your pants. Hold the tape firmly, but not tightly. Note - For shirts and coveralls, measure the largest portion of the mid-section.

E - HIPS

Stand with your heels together. Measure around the fullest part of the hips. Hold the tape measure straight and level.

F - THIGH

Measure the circumference of the upper leg close to the crotch (approximately 1" below crotch).

G - KNEE

With the leg straight, measure the knee circumference over the knee cap and parallel to the floor.

H - CALF

Measure the circumference of the largest part of the lower leg approximately half way between the knee and ankle and parallel to the floor.

I - ANKLE

Measure the ankle circumference over the ankle bone and parallel to the floor.

J - UPPER ARM / BICEP

Measure the maximum circumference of the upper arm just below the underarm.

K - FOREARM

Measure the maximum circumference of the forearm at approximately 6" above the wrist.

L - CAP / HAT SIZE

Measure the circumference of the head at its widest diameter, approximately 1/8" above the ears.

M - SLEEVE

Bend the elbow as shown (see M). Start at the center back neck and measure across shoulder to the elbow and down to the wrist bone.

N - ACROSS SHOULDER

While standing with arms down, measure across the back from one shoulder joint to the other.

O - WRIST

Measure the wrist circumference over the wrist bone.

P - HEIGHT

Stand straight against a wall without your shoes. Make a mark level with the top of your head. Measure from this point down to the floor.

Q - INSEAM

Standing straight, measure the distance from the crotch to just below the ankle bone. Or - using similar style pants that fit you well; lay garment flat and with the front and back creases smooth. Measure the inside seam of one leg from the bottom of the hem to the crotch (see Qb).

R - OVERARM (BLAZERS)

With arms at the sides, measure around the broadest part of the shoulders and upper arms, keeping the tape level at all times. If overarm is more than 7" larger than the chest, go up one size.

S - OUTSEAM

Measure along the outside of the leg from the top of the waistband to the bottom of the hem or just below the ankle bone.

Sa - OUTSEAM ON GARMENT

On an existing garment: lay garment flat, measure along the outseam from the top of the band to the bottom hem.

T - FRONT AND BACK RISES

Front - this is the distance from the center front at the top of the waistband to the intersection of the crotch seam.

Back - this is the distance from the center back waistband to the intersection of the crotch seams.

SIZE CHARTS

Important! Order garments based on your measurements. Measurements may vary by style. Short Sleeve Length adds 1" for Longs. Tail length adds 2" for Longs. For a roomy fit, please order shirts one size (2 inches) larger than your chest measurement.
